River Thames

How do people change places?

- I can compare the buildings of Cairo and London.
- I can describe the transport in Cairo and London.
- I can explain why people choose to visit London and Cairo.

Where am I?

- **I know where the world's seven continents and five oceans are.**
- **I can locate London and the River Thames on a map.**
- **I can locate Cairo and the River Nile on a map.**
- **I can locate the Equator on a globe and on a map.**
- I know where hot and cold places are on a map.

How do we know about different places?

- I can use atlases, globes and world maps.
- I can use North, South, East and West on a compass.
- **I can use language to describe where a place is.**
- I can talk about what I notice in photos taken from the air.

Are rivers the same?

- I know some similarities and differences between London and Cairo.
- I know some similarities and differences between the River Thames and the River Nile.
- I can name and describe some of the animals and plants found in these places.
- I can explain why some things are the same and why some things are different in these two places.

Geography
Learning about places in the world.

Near
Something close-by.

Far
Something that is not close.

Beach
Land next to the sea which is usually pebbly or sandy.

Cliff
A steep wall of rock.

Coast
The area where sea and land meet.

Forest
A place where there are mostly trees.

Hill
A piece of land that rises higher than everything around it.

Mountain
Is higher and steeper than a hill.

Ocean
A huge amount of saltwater.

Sea
Is smaller than an ocean and made up of saltwater.

River
The path that water takes as it flows over land, made of freshwater.

Valley
A long, low area of land, often between mountains and hills.

Vegetation
The plant life of an area.

Port
A place where boats can go to load and unload their supplies.

Harbour
A safe place for ships and boats to stay.
