

3 Urban and Rural

How do we find places around the world?

- I know the location of countries within continents around the world, including Kenya, Egypt, Italy and the UK.
- I can locate counties within the UK, including Cornwall.
- I know the location of some rivers within the British Isles, including the Mersey, the Thames and the Tamar (pronounced "Tay-mar").
- I know that the equator is the line around the widest part of the globe that separates the Northern and Southern hemispheres.

How do we know about different places?

- I can use maps, atlases, globes and digital mapping to locate countries.
- I can use symbols and keys to describe features.
- I can use N, NE, E, SE, S, SW, W and NW on a compass.
- I can use alphanumeric grid references on a simple map (e.g. find D4).

What are urban and rural places in the UK like?

London:

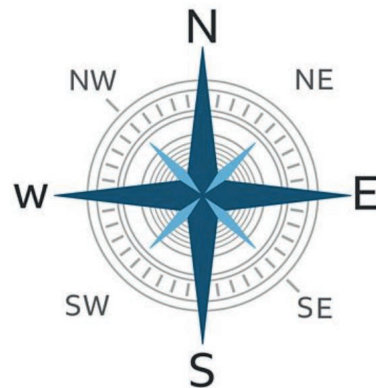

Urban, developed land use - commercial, recreational and residential, with no agricultural or mining.

Cornwall:

Rural, much more undeveloped land use, with developed land used for agricultural and mining.

How do humans use the land in the UK?

- I know different types of settlement, including villages, towns and cities.
- I know that settlements are often located near rivers, as they need a water supply.
- I know that land is used in different ways in the UK, including agriculture, commerce, housing and mining.
- I know how food is distributed from rural farms to urban shops.

The River Tamar, Cornwall

The River Thames, London

Equator

The imaginary line running around the widest part of the middle of planet Earth.

Hemisphere

One half of the planet Earth.

Poles

The most Northern and Southern points of the globe.

Urban

An area where lots of people live, e.g. a city or town.

Rural

An area where not many people live, e.g. the countryside.

Mine

A place where people dig to find coal, minerals or metals.

Agricultural

Where land is used to farm food.

Commercial

Where land is used for businesses.

Residential

Where land is used for homes.

Recreational

Where land is used for exercise and relaxation.

Developed land

Land humans have built on.

Undeveloped land

Land that humans have not built on.
